△ RIB LATH

METAL

Product Name	RIB LATH
Surface:	Electro galvanized, Hot dipped galvanized
Details	WIDTH:61CM LENGTH: 244CM 250CM THICKNESS:3.0MM 4.0MM
Rib Lath is expanded metal lath, stiffened by longitudinal 10mm depth of ribs at 100mm intervals, and formed in the same sheet of metal. It is designed to allow flexibility in shape forming of complex structures and used extensively for suspending ceilings and partitions, structural encasement for fireproofing, refurbishment works and construction joints.	

Product Name	HIGH RIB
Surface:	Electro galvanized, Hot dipped galvanized
Details	WIDTH:61CM LENGTH: 220CM 250CM 300CM THICKNESS:3.0MM 4.0MM
High Rib is maded from high standard quality galvanized steel sheets. It is a specially designed steel grating. To help in adhesion to concrete It is strong and also saves time and increases the convenience of work. Helps reduce steps in preparing concrete surfaces. Can pour cement continuously without waiting for it to dry.
